REMEMBER... Your Early Payment Incentive??

You may recall that a new and exciting early-payment incentive was offered in the form of a \$100 gift card redeemable in either the pro shop or clubhouse. We have noticed that many of these gift cards remain unused. We want to offer you a friendly reminder that the \$100 gift card must be used by October 31, 2011. After that date, the gift card will expire and any remaining balance will not be available for use. We urge you to take advantage of your incentive and enjoy the many products and services available at SCCC.

As the summer heats up, remember that you can always cool down in the coolest place around...Fairway Junction Bar & Grille - where you don't have to play 18 holes to enjoy the 19th! Come discover what many already know...your clubhouse is the best kept secret in town.

Whether it's a special function with a custom menu, a business lunch, a family dinner, or beers and apps after golf...Fairway Junction is the clear-cut answer to satisfy your needs. Daily specials and a very versatile menu compliment one of the largest beer selections in town.

We invite you to come down to the club, check out the atmosphere, and enjoy the service from the very courteous staff.

He's Back...

What is the Stimpmeter and How Does it Work??

The Stimpmeter is a 36-inch long, aluminum tool used by golf course superintendents to make a standard measurement of the relative speed and uniformity of their greens. A Stimpmeter reading is actually a distance measurement in feet and inches.

At one end is a ball release notch that is designed so that a golf ball will always be released and start to roll when the Stimpmeter is raised to an angle approximately 20 degrees to horizontal. The basic steps to measure green speed start by rolling three golf balls in one direction on a level area of the green. The three distances are measured and averaged. Using the average stopping point of the first three golf balls, the step is repeated along the same line, but in the opposite direction. The distances obtained in steps one and two are averaged, resulting in a Stimpmeter reading for the green. The longer the distance, the faster the green. A reading of 8-9 feet is considered a medium to fast speed for day-to-day play.

The Stimpmeter is a helpful management tool for the golf course superintendent in providing smooth, consistent putting surfaces, but is not intended for course-to-course comparisons by golfers.

During the Member-Guest, our Stimpmeter readings were a speedy 9.8 - 10.4!

Pro Shop hours in August will be 6:30 am until dark. Due to maintenance crew time constraints, our first tee time will be at 6:48 am. If you need assistance and the Pro Shop is unavailable, please call Jaime at 645-9822 or Rob at 505-385-5683.
